**AN ABNORMAL OBJECT APPEARED AT PUSAN PORT: U.S.
STRATEGIC ASSETS WOULD NOT FIND THEIR RESTING
PLACE IN THE KOREAN PENINSULA**

Press Statement Published by the Korean Central News Agency

September 26, 2024

The Aerospace Reconnaissance Agency, an independent intelligence organ directly under the head of state of the Democratic People's Republic of Korea, captured an abnormal object at a wharf, a subject of its constant attention at Pusan Port of the ROK at 10:03:10 on Monday and reported its reconnaissance data.

A nuclear submarine appeared on the wharf where a U.S. aircraft carrier used to moor at.

The latest nuclear submarine, which has never appeared openly since it was commissioned in 2020, made its appearance at the Pusan operation base for the first time in history. It can be hardly regarded as a "sightseeing voyage".

Given the U.S. has been demonstrating its overall strength recently while making public the "might" of its nuclear strategic assets in order, one can easily guess the true aim of the open portcall of the nuclear submarine which should have been concealed under the "surface of water."

In June the U.S. forces launched Minuteman-3 intercontinental ballistic missiles twice and on September 18 they opened to the public the test-flight image of B-21 Raider, a next-generation stealth strategic bomber, for the first time.

The U.S. let the latest nuclear submarine of the U.S. Navy anchor in Pusan Port of the ROK, thus took out all its cards called "three nuclear strategic assets".

This clearly reveals the frantic military and strategic attempt of the U.S. hell-bent on intentionally demonstrating the "superiority of strength" before the world.

The U.S. is now experiencing unprecedented strategic inferiority in the Korean peninsula and the Asia-Pacific region and is very afraid of the reality in which the entity of the strong power of independence against the U.S. and the fortress for defending justice is beginning to make its appearance in the region.

Therefore, it is deploying all nuclear strategic assets in the Korean peninsula and its vicinity while cooking up various large and small military blocs in the region to contain the DPRK and independent sovereign states by force of arms and to "bind" the group of its followers who feel uneasy and impatient.

The Wilmington Declaration making the "nuclear threat" from anyone the subject of discussion was fabricated at the QUAD summit meeting held in Delaware State of the U.S. some days ago and the promise for the U.S.-Japan-ROK cooperation to cope with the so-called "ever-increasing nuclear threat" was made at the U.S.-Japan summit held on the same day. They are also typical products of the U.S. geopolitical sinister intention to politically and militarily encircle and stifle the DPRK and regional countries.

The U.S. latest nuclear submarine's visit to the port of the ROK is a proof that the U.S. ambition to often take up nuclear strategic assets, boast of its strength, increase its threat to the rival and "enjoy" its hegemonic privilege by dint of its malicious strength at any cost is getting ever more extreme.

No matter how the U.S. may demonstrate its "overwhelming capability" by rising to the surface even a submarine whose mission is to mount a final nuclear strike under the sea, nothing will change.

The DPRK's nuclear war deterrent to cope with and contain various threats from outside is bound to be bolstered up both in quality and quantity continuously and limitlessly as the security of the state is constantly exposed to the U.S. nuclear threat and blackmail.

The U.S. nuclear submarine's call at Pusan Port may be a break time for the U.S. marines and a comfort for the U.S. stooges, but it can never be an object of fear in the face of the super-powerful entity standing over against the U.S.

The U.S. strategic assets will never find their resting place in the region of the Korean peninsula.

We will continue to inform that all the ports and military bases of the ROK are not safe places.

The U.S. is by no means a "pronoun of security".

IS IT “BOAST OF STRENGTH” BY GROUP OF CURS OR FUNERAL PROCESSION OF COLONIAL MERCENARY ARMY – IMPRESSION ON EVENT MARKING “ROK ARMED FORCES’ DAY”

Press Statement Published by the Korean Central News Agency

October 4, 2024

The sound of a hollow drum is louder.

Empty vessels make the greatest sound. An event marking the "ROK Armed Forces' Day" held in Seoul on Tuesday was like it.

This time the ROK invited lots of cohorts and staged a series of such farces as ceremony and street march to commemorate the "ROK Armed Forces' Day".

It displayed more than 80 kinds of military hardware, including the "three-axis system" and manned or unmanned weapon system, talking with all rhetoric about the appearance of "a strong national army" and "demonstration of deterrent against the north".

To say a word about such event, it was no more than a foolish farce, with neither trace nor echo like that a group of curs passed across a stream.

However, that event was so loudly advertised by the ROK. So, I am going to comment on it with a few sentences.

Really distinctive was that a U.S. forces' B-1B strategic bomber appeared as the main player of the event and reviewed the ROK army.

Amid the U.S. B-1B strategic bomber flying over Seoul, the military chief of the ROK and his stooges and the three services of the puppet armed forces were courteously lining up to pay regards to it. The scene was so pitiful to see alone. It may be unique in the world military parade history and the best scene that can be produced only in the colonial ROK.

Great irony is that, not content with the B-1B, the puppets put on the stage an odd monster called "Hyonmu-5" ballistic missile, embellished with absurd sophism that it is little short of a tactical nuclear weapon class as its warhead weights eight tons.

Perhaps, the ROK puppets have a strange way of thinking that a conventional warhead, if its powder increases in weight, can be transformed into a nuclear warhead.

It may be appropriate for demonstration or appeasement, but the world people cannot but question about its military use.

Who would make such a "huge cart" for the launch of merely eight-ton warhead. The reason is that it only looks like a monster to launch the eight-ton warhead.

I can simply explain the military effectiveness and might of our multiple rocket launchers by comparison with it.

The launching capacity of our one multiple rocket launcher, which is not equal to half the size of the "deformed cart", is calculated to be equal to 900 tons of explosive power in terms of the explosive capacity of a conventional warhead.

If a man has a certain degree of common sense, he could not talk about the "end of regime" of someone with a weapon of worthless large bulk.

They must know the shame.

If it had not been opened to public, the "mysterious ghost weapon" would have been more effective in propaganda.

However desperately they may try to show that they are not being pushed back from the confrontation of strength, this is a foolish act before the nuclear weapons state. And they proved by themselves once again that they can never cross the wall of inferiority in strength, the fate of a non-nuclear weapon state.

Media boasted of the transporter erector launcher's mobile ability of sidewise movement, which is only a necessary function when parking.

Next, let us mention Yoon Suk Yeol's remarks that the event was more significant with the establishment of a "strategic command" of the ROK.

The group, which has failed to possess a single strategic weapon, cooked up the "strategic command". This is little short of a mange-affected dog wearing a helmet.

No matter how much the dog may wear helmets, it can't be a tiger or a lion.

Nevertheless, Yoon clamored in full tide of passion that they have a "core strategic force giving faith and trust to the population". It is nothing but a hungry dog barking with joy of getting a bone.

Yoon, who entrusted the security to his master and bragged about his strength by relying on it, had been a little naïve in my view.

Tragedy is that Yoon could not realize at all that all the recent despicable behaviors are hastening the time-table for self-destruction.

Though the head of our state put a precondition of the word "if", he re-clarified the stand to use all the offensive forces of the country without hesitation if the ROK attempts a military confrontation with the DPRK, being overconfident of the ROK-U.S. alliance.

The confrontation outcry, raised by Yoon Suk Yeol with war fever this time, is no more than a last-ditch scream of a guy at death's door.

Even if he was mad over bluffing, it was none other than an exposure of anxious and impatient psychology without filtering.

What the ROK clans clearly showed through the recent farce from the beginning to the end is that the ROK, trained completely into a cheap mercenary of the U.S. and reduced to a bullet-shield for realizing its master's ambition for hegemony, is fearlessly dashing into the bottomless pit of downfall, together with the U.S. falling into decay and ruin with each passing day.

Then, the world people will surely comment on it. Is the event marking the ROK "army day" a "boast of strength" by the group of curs or a funeral procession of colonial mercenary army?

The answer is clear.

**ROK MILITARY WILL BE HARD TO EVADE THE BLAME
FOR HAVING ORCHESTRATED OR JOINED IN COMMITTING
SUCH A GRAVE INFRINGEMENT ON DPRK SOVERIGNTY**

Press Statement Published by the Korean Central News Agency

October 12, 2024

The most childish and ignorant Republic of Korea is resorting to a stereotyped method pertaining to its inborn nature to evade the blame for the recent drone intrusion case.

As soon as the Foreign Ministry of the DPRK issued a crucial statement, military gangsters of the ROK were busy trying to evade the responsibility while making a shameless and childish excuse, saying that they did not do it and have not yet grasped the situation and the military did not send drones to the north and should confirm the fact that a non-governmental organization might send drones.

It is a miscalculation if the ROK thought that they could go unpunished after committing such grave infringement upon the sovereignty of our state, though the military impudently asserts that they did not do it, and avoid the concern of the international community.

It would be evidently problematic if the military did not identify that drones by a non-governmental organization crossed the border at random.

The ROK military has loudly advertised its "watertight detection and tracking ability".

The military would strain its nerves, mistaking a flying flock of birds for "drones from the north". Then, did it become blind all of sudden?

It has asserted that the fact about drones from its region, which had crossed the border several times, should be confirmed. Accordingly, I wonder what the ROK people talk about the military.

Leaflet-scattering over the capital city of the opponent country is regarded as a grave politically-motivated provocation and an infringement upon sovereignty, but what is

the basic gravity of the recent case is the fact that drones are means which carried those leaflets.

If the military has connived at the fact that its people committed an act of openly infringing upon other's sovereignty by use of drones recognized by the world as an undeniable military multi-purpose means and at the fact that such infringement means that can be considered to be provocative can occur an incident fostering the danger of arms conflict, crossing the border of an opponent country, it is a deliberate connivance and conspiracy and only provides a clear proof that the leading figures in the drone infiltration case are none other than the military gangsters.

Even though they boasted that they are the "strong ROK army", talking about "together with the people" on the "ROK army day" some days ago, they are using the people as a shield without hesitation at a blind alley. Their sordid wordplay only reveals the meanness and baseness of the military of the ROK.

As their assertion shows, it means that though our non-governmental organizations scatter political agitation leaflets in the sky over the presidential office in Seoul with drones, it is not problematic.

I'd like to watch how the government of the ROK and, in particular, the military gangsters will respond to such real thing.

In conclusion, the ROK military directly committed the drone infiltration case or the provocation of infringing upon the sovereignty of the DPRK was committed under its positive fostering and connivance.

Indeed, the minister of National Defense of the ROK, when his petty excuse of shifting the blame to the non-governmental organization did not work on, expressed his uncertain attitude, saying that "it is impossible to confirm it strategically in terms of national security and strategic security."

Such attitude of neither denying nor admitting the case proves that the military admitted by itself that it is the chief criminal or accomplice of the current incident as a revelation of its mental state that it can admit the case, unable to deny it.

It is little short of an open declaration that even though a provocation of infringing upon the sovereignty of the DPRK that "can not be confirmed" is repeated or it leads to the outbreak of war, they have no responsibility for it.

As we have already foreseen and the world has witnessed at all times, this time, too, the ROK is trying hard to distort the truth and deceive the world people with groundless assertion made by it with its habitual excuse and deformed thinking.

Revealed before the world once again were the base nature and astonishing real picture of dangerous those to gamble with the lives of the people.

Clear is that ROK scum conducted a rubbish balloon campaign with provocative nature for the first time and those of the ROK have steadily aggravated the situation, far from abandoning their dirty bad habit despite our warning.

The ROK is crying that we had flied "dirty balloons" 28 times just like a guilty party filing the suit first but it is well advised to make public how many times the organizations of defectors from the DPRK did such acts before it calculates the times.

Our entire act is an essential measure taken in the principle of correspondence.

No matter how desperately the ROK may try to mislead public opinion as if our correspondence is taken without reason, it will not come up to its intention.

We have no concern about who is the main force of provoking the recent drone incident and its performers.

We only look squarely the fact that whatever the military gangsters and an organization of human scum who defected from the DPRK, they are the fellows of the shameless ROK.

As we repeat our clear stand, we will take a strong corresponding retaliatory action in disregard of ingredient in case drones carrying anti-DPRK political motivation rubbish from the ROK across the border infiltrate again into the territorial sky of the DPRK.

This is the exercise of the sovereign state's right to self-defense that cannot be considered.

Those who are not taking any proper stand to check escalation of tension and armed conflict but making a bluff and lame excuse with reckless courage, even though they made Seoul Municipality and the whole of the ROK a target and put their people on the kitchen board will certainly hear only the people's voices of criticism.

They will be well advised to worry about the immediate price for repeated provocation and cope with it.

Even though the ROK military is racking its brain to evade the responsibility for their infringement upon the sovereignty of the DPRK with incoherent impudence and abnormal sophism, they will certainly pay a dear price for violently infringing upon the inviolable sovereignty of our state and doing a serious harm to its security in any way.

I hope that the people will judge whether the strong and brave reckless and bold attitude of the ROK military which jumps from the frying pan into the fire will defend the genuine safety of the ROK.

As I reaffirm once again, as clarified by the DPRK Foreign Ministry, our attack time for destroying Seoul and the military force of the ROK is not clarified in our military action plan.

That time is not set by us.

However, the moment that a drone of the ROK is discovered in the sky over our capital city once again will certainly lead to a horrible disaster.

Personally, I wish that such thing will not happen.

RECKLESS CHALLENGE HYSTERIA WILL HASTEN THE MISERABLE END OF THE ROK

Press Statement Published by the Korean Central News Agency

October 13, 2024

The Ministry of Defense of the puppet Republic of Korea, which went busy shirking responsibility after perpetrating an extremely dangerous politically-motivated military provocation by using even drones, world-recognized major military attack means, has finally and fully betrayed its true colors as chief provocateur and culprit.

Much upset by the frosty public gaze and media hype, the puppet Ministry of Defense slipped off its veil of ambiguity just within 24 hours and made public what it called a statement of its stand on Sunday, in which it let out a string of impudent rubbish turning black into white that branded our just will to exercise the right to self-defence as "a typical trick to breed discord in the south and turn the tide of situation" and held the DPRK "wholly accountable for the current situation." Worse still, it officially announced its reckless suicidal choice, disgustingly and impudently touting once again the "end of regime" in the DPRK.

This is just an unpardonable, malicious challenge to our state and people that offered with maximum patience an opportunity once again to it as an ultimatum, and a hideous crime of seeking to light a fuse for the outbreak of a war at any cost.

The world should correctly know those silly, stupid and dangerous ones.

They go beyond human knowledge and imagination in their recklessness, affected by weird mutations.

They defend their country and people with bluffing and tongue-lashing.

They will be in a fit of hysteria until their miserable deaths.

Such scum should be thrown into a dumping ground.

It seems that the gangsters of Seoul persist in bluffing, still failing to properly judge the circumstances and misjudging the current situation as a trade of insult.

The military gangsters of the ROK should refrain from acting rashly.

They should immediately opt for guaranteeing the prevention of recurrence of such provocation as violating the airspace of another country.

**PRESS STATEMENT OF KIM YO JONG, VICE DEPARTMENT
DIRECTOR OF THE CENTRAL COMMITTEE OF THE
WORKERS' PARTY OF KOREA**

October 23, 2024

The reckless infringement upon the sovereignty of the DPRK by the ROK military gangsters is a hideous military provocation that can never be pardoned.

Seoul will have to experience at first hand so as to know properly how dangerous act it committed and how terrible and fatal the consequences it brought on itself are.

A military provocation against a nuclear weapons state may be led to horrible situation, unimaginable for politicians and military experts in any big or small country in the world with their normal thinking to experience. So, there will be no such instance except one recently made by lunatics of the ROK and Ukraine.

Such deed can be done only by lunatics in the Seoul and Kiev regimes.

Seoul and Kiev are exact counterparts in going about begging and letting loose reckless remarks against nuclear weapons states at random without follow-up capability.

It seems to be a common feature of bad dogs bred by the U.S.

The DPRK detective agencies' investigation into the drones from the ROK is going on and the truth behind the despicable provocation of the ROK military gangsters will be analyzed further in detail.

No one knows how our retaliation and revenge will be completed.

A lot of political motivational rubbish sent by the ROK scum was discovered and removed in many parts of the DPRK on October 21, too.

The brute courage of the Seoul authorities to jump into fire with brushwood on their backs, far from reflecting on their conducts and being prudent, will bring the danger of destruction of all the scum. And they will be denounced by everyone else.

**PRESS STATEMENT OF KIM YO JONG, VICE
DEPARTMENT DIRECTOR OF THE CENTRAL COMMITTEE OF
THE WORKERS' PARTY OF KOREA**

November 17, 2024

On November 16, various kinds of political agitation leaflets and dirty things sent by the ROK scum were dropped in many areas near the southern border and even in the depth area of the DPRK.

A continuous report of this was made from various parts all day long yesterday.

The security forces organs in the areas where the report of discovery was made have blocked the relevant districts and are conducting the work for searching, gathering and disposal.

We strongly denounce the shameful and dirty acts of the ROK scum who committed the provocation of scattering anti-DPRK political and conspiratorial agitation things once again in disregard of our repeated warnings.

There will be no house owner who hardly gets enraged at such dirty rubbish scattered in the clean yard, which even a mutt dislikes to touch.

The inviolable territory of the DPRK is being polluted, and much labor had to be used in disposing of these wastes.

There is a limit to patience.

The DPRK people's anger at the most disgusting curs has reached the extremes.

The scum will have to pay a dear price.

**PRESS STATEMENT OF KIM YO JONG, VICE
DEPARTMENT DIRECTOR OF THE CENTRAL COMMITTEE OF
THE WORKERS' PARTY OF KOREA**

November 26, 2024

On Nov. 26, various kinds of political agitation leaflets and dirty things sent by the ROK scum were dropped again in different areas near the southern border of the DPRK.

The security forces organs in the areas have blocked the relevant districts and are conducting the work for searching, gathering and disposal.

We strongly denounce the despicable acts of the ROK scum who committed the provocation of polluting the inviolable territory of the DPRK by scattering anti-DPRK political and conspiratorial agitation things again.
