CLARIFICATION OF STAND ON ISSUE OF DPRK-BELARUS TOP-LEVEL MEETING

Press Statement Published by the Korean Central News Agency

January 20, 2025

According to a report of TASS on January 17, the Belarusian president said that the DPRK and other Asian countries proposed to Minsk organizing the top-level meeting for the discussion of the issue of cooperation.

I know well that the Belarusian side has been hoping for the top-level contact with the DPRK from at least two years ago.

But if I understand the context of TASS report released on Jan. 17 as it is, it seems not to properly reflect the desire of Belarus.

If I comment on the report of TASS on the speaking of the Belarusian president that we proposed a top-level meeting to Minsk for a discussion of the issue of cooperation, there is no such thing, at least, as far as I know.

If Belarus hopes to develop a cooperative relationship with the DPRK, it is important to clarify its intention correctly.

I think that such veracity and frankness should be the starting point in the relations between the two countries.

The DPRK would welcome with joy the Belarusian side without any reason if it wishes to develop friendly and cooperative relations with the DPRK from this stand.

CONSTANT DEPLOYMENTS OF U.S. STRATEGIC ASSETS HIGHLIGHTS URGENCY OF THE DPRK TO BOLSTER UP ITS SELF-DEFENSIVE NUCLEAR WAR DETERRENT

Press Statement Published by the Korean Central News Agency

March 4, 2025

The U.S. is frequently committing provocative acts of aggravating the situation in disregard of the security concern of the Democratic People's Republic of Korea.

The U.S. Navy nuclear carrier Carl Vinson strike group entered the Pusan operation base in the ROK again on March 2 under the pretext of "demonstrating the ROK-U.S. alliance and increasing inter-operability".

The Carl Vinson strike group took part in the war drills together with Japan and the ROK in the waters around the Korean peninsula in January last year. It is reported that the strike group consists of cruiser Princeton, Aegis destroyer Sterett and others.

Entering this year, the deployment of the U.S. nuclear strategic means on the Korean peninsula is the second one in the wake of the nuclear submarine Alexandria, and the U.S. Navy carrier appeared eight months after the Theodore Roosevelt in June last year.

If the actions of strategic bombers are put together, the U.S. is hurling strategic assets into the Korean peninsula at the constant deployment level.

In fact, the U.S. spent the whole of 2024 with the largest anti-DPRK war exercises ever in history. As soon as its new administration appeared this year, the U.S. has stepped up the political and military provocations against the DPRK, "carrying forward" the former administration's hostile policy.

It is necessary to read a diary of the confrontation hysteria of the U.S. and its stooges one by one.

On January 10, just before the retirement of the former administration, the U.S. held the 4th U.S.-ROK "nuclear consultative group" meeting in Washington to discuss a nuclear war drill on the Korean peninsula and an increase in the visibility of deploying U.S. strategic assets. And it deployed B-1B strategic bombers in the sky near the

Korean peninsula on Jan. 15 to conduct a U.S.-Japan-ROK joint air drill, as part of the clear action practice.

Timed to coincide with this, the U.S., together with the ROK army, staged a large joint firing drill aimed at the long-range artillery fire system of the DPRK on Jan. 14-16, and a Ssangmae joint air drill on Jan. 21-24 under the pretext of increasing the capability for cooperation in air operations.

The U.S. held a confab with the diplomatic authorities of Japan and the ROK on Feb. 15, with the international security conference held in Munich of Germany as an occasion, and cooked up and made public a "joint statement" with "strengthened offer of U.S. nuclear umbrella through U.S.-ROK and U.S.-Japan alliances" as the main point, viciously pulling up the DPRK over its sovereign rights.

A few days later, it let its B-1B strategic bomber fly over the sky of the Korean peninsula again on February 20 to stage a joint air drill together with the Air Force of the ROK.

The U.S. vicious moves for confrontation with the DPRK have been intensified in March with the appearance of Carl Vinson in the Korean peninsula. Such moves will reach the climax with the U.S.-Japan-ROK naval drill and the Freedom Shield joint military exercises, to be staged this month with Carl Vinson involved, as a momentum.

ROK media claim that the entry of Carl Vinson is aimed "to substantially implement the U.S. government's reaffirmed commitment to permanent and iron-like extended deterrence" and to "display the strong joint defence posture of the ROK-U.S. alliance to cope with threat" from someone.

With such practical action measures, the U.S. has clearly shown its most hostile and confrontational will to the DPRK.

The root cause of escalating tension on the Korean peninsula clearly lies in the U.S. and its allies which are further intensifying military moves to implant NATO infrastructure in the region and improve the level of war preparations.

The DPRK bitterly condemns the reckless visible actions and muscle-flexing of the U.S. and its vassal forces disregarding and violating a sovereign state's security concern and jeopardizing the peaceful environment in the whole region.

As indicated by the regional military situation, the U.S. and its stooges' heinous ambition to threaten, pressurize and bring the DPRK to its knees by force of arms is developing into a more reckless phase with the passage of time.

As for the DPRK's nuclear policy formulated as a main law of the DPRK, it was adopted in correct reflection of the concern for state's security by the present and future threats. And the present reality further highlights the justness, validity and necessity of the DPRK's line on bolstering up its nuclear forces.

The action-accompanied hostile policy toward the DPRK pursued by the U.S. at present is offering sufficient justification for the DPRK to indefinitely bolster up its nuclear war deterrent.

We will never confine ourselves to sitting still and commenting on the situation.

If the U.S. continues to renew its records in the anti-DPRK military demonstration, the DPRK will be naturally compelled to renew its records in the exercise of strategic deterrence.

The DPRK is also planning to carefully examine the option for increasing the actions threatening the security of the enemy at the strategic level to cope with the fact that the deployment of U.S. strategic assets in the Korean peninsula has become a vicious habit and adversely affects the security of the DPRK.

The enemies should not test the will and ability of the DPRK to defend the sovereignty and security interests of the state by mobilizing all means in hand.

It's a very dangerous thing.

THE ANACHRONISTIC 'DENUCLEARIZATION' IDEA OF THE U.S., JAPAN AND THE ROK CAN NEVER AFFECT THE POSITION OF OUR STATE

Press Statement Published by the Korean Central News Agency

April 9, 2025

The diplomatic authorities of the U.S., Japan and the ROK again talked about someone's "complete denuclearization", terming the Democratic People's Republic of Korea's exercise of its sovereign rights a "threat" at the recent NATO foreign ministers' meeting.

It only fully exposed the uneasiness of the U.S., Japan and the ROK in a desperate plight of having to talk about "denuclearization" in chorus although they just know that "denuclearization" of us is nothing but a daydream that can never come true.

Just two months ago, we clarified how stupid the U.S. is in pursuing the goal of "denuclearizing" the DPRK, something utterly impossible and unrealistic in practice and conception.

They still talk about "complete denuclearization," lost in the past daydream that brought them to failure, revealing themselves how anachronistic and absurd their level of political judgment is.

Did they come up with a good way to realize someone's "denuclearization" whenever they had a loud brainstorming session?

If they frantically cry out for "denuclearization", really believing in it, they must be termed nonsensical.

The position of the Democratic People's Republic of Korea as a nuclear weapons state, established along with the existence of its substantial and very strong nuclear deterrent and permanently fixed in its supreme and basic state law according to the unanimous will of all its people, is a result of the inevitable option which accurately reflected the hostile threat from outside and the change in the present and future world security mechanical structure. So it does not change no matter how desperately anyone denies.

We don't care about anyone's denial and recognition and we never change our option.

This is our steadfast choice that can never be reversed by any physical strength or sly artifice.

If anyone openly talks about dismantlement of nuclear weapons before us or seeks to revive the dead concept of "denuclearization" under various pretexts, it just constitutes the most hostile act of denying the sovereignty of the DPRK and forcing it to renounce its constitution and social system. I made it clear once again on this occasion.

The nuclear forces of the DPRK not only play a key role in deterring aggression and threat from outside and defending the sovereignty and security of the state but also make an important contribution to ensuring the regional and global balance of power and strategic security.

The only way for the U.S., Japan and the ROK to defuse their current security concern is to completely refrain from their unilateral attempt to change the status quo and shake the present position of the DPRK and sincerely find a method to avoid head-on conflict.

If the U.S. and its vassal forces continue to insist on anachronistic "denuclearization" while talking about "threat" from someone, it will only give unlimited justness and justification to the advance of the DPRK aspiring after the building of the strongest nuclear force for self-defence.

The DPRK will make steady responsible efforts to thoroughly defend the supreme interests of the state and ensure regional peace and stability, given that the U.S. has gone to extremes in its nuclear threat and its nuclear alliance is getting desperate in its confrontational moves as days go by.

THE DPRK-ROK RELATIONS HAVE GONE COMPLETELY BEYOND THE TIME ZONE OF THE CONCEPT OF HOMOGENOUS

Press Statement Published by the Korean Central News Agency

July 28, 2025

The suspension of loudspeaker broadcasting against the DPRK, a halt to leaflet scattering and the allowance of individual ROK people for tour of the DPRK - these are details of the "sincere efforts" the Lee Jae Myung government of the ROK made since the moment of coming into office with hope for improved relations with the DPRK.

In addition to that, Jong Tong Yong, newly-appointed minister of Unification, proposed putting an end to the time of power for power and opening up the time of addressing the good will in kind, the time of reconciliation and cooperation, talking about the revival of the disappeared peace and the restoration of the collapsed south-north relations.

Recently, he is spinning a daydream, guessing the possibility of inviting someone to the Asia-Pacific Economic Cooperation summit to be held in Kyongju a few months later.

We did not care who is elected president or what policy is being pursued in the ROK and, therefore, have not made any assessment of it so far.

But this time I'm going to make our stand clear.

As for the suspension of the anti-DPRK psychological propaganda broadcasting which the ROK authorities described as the first signal for the restoration of confidence between the south and the north, all this is the scourge they have voluntarily invited and thus it is the issue of themselves no matter how they settle it and is nothing but a reversible turning back of what they should not have done in the first place.

In other words, it is not the work worthy of appreciation.

If the ROK, which had stoked the atmosphere of extreme confrontation in the past after unilaterally declaring the DPRK as its principal enemy, expected that it could

reverse all the results it had made with a few sentimental words, nothing is more serious miscalculation than it.

The past few years that the Lee Jae Myung government described as the worst and foolish period were not only the meaningless time for the DPRK.

The DPRK could reach a very important historical conclusion that the ROK, whether it advocates the "democracy" or assumes the mask of "conservativeness", can never be the partner of reconciliation and cooperation and throw away the preconceived idea contradictory to the reality after breaking away with a very tired and uncomfortable history fettered by the rhetorical expression of fellow countrymen.

We can confirm once again that the true nature of the ROK politician who is surely enslaved to the departed spirit of unification by absorption can not be changed as the fact shows that he has set as a task of the times the normal operation of the Ministry of Unification that must be dissolved along with the reality in which the state-to-state relations are permanently fixed on the Korean peninsula.

When only the 50-odd days since Lee Jae Myung's assumption to power are brought to light, leaving aside the past history of the successive regimes of the ROK, the ROK authorities made such sweet remarks as defusing tension on the Korean peninsula and improving the DPRK-ROK relations, but their blind trust to the ROK-U.S. alliance and their attempt to stand in confrontation with the DPRK are little short of their predecessor's.

The land of the ROK adjacent to our southern border will be stained by powder fumes through the successive large-scale joint military drills of aggressive nature, and the U.S. and the ROK will try to shift the blame for the deteriorating situation on the Korean peninsula caused by them onto us as they did in the past. The world will soon witness it.

No matter how desperately the Lee Jae Myung government may try to imitate the fellow countrymen and pretend they do all sorts of righteous things to attract our attention and receive international attention, there can be no change in our state's understanding of the enemy and they can not turn back the hands of the clock of the history which has radically changed the character of the DPRK-ROK relations.

We clarify once again the official stand that no matter what policy is adopted and whatever proposal is made in Seoul, we have no interest in it and there is neither the reason to meet nor the issue to be discussed with the ROK.

The DPRK-ROK relations have irreversibly gone beyond the time zone of the concept of homogeneous.

THE CONTACT BETWEEN THE DPRK AND U.S. IS ONLY A 'HOPE' OF THE U.S.

Press Statement Published by the Korean Central News Agency

July 29, 2025

Shortly ago, a person in authority of the White House said that the president stabilized the situation on the Korean peninsula and reached the first top-level agreement on denuclearization through the three DPRK-U.S. summit meetings during his first term of office and that he is still open to dialogue with the DPRK leader for achieving the complete denuclearization of the DPRK.

We do not want to give any meaning to the U.S. side's unilateral assessment of the past DPRK-U.S. dialogue.

It is worth taking into account the fact that the year 2025 is neither 2018 nor 2019.

The recognition of the irreversible position of the DPRK as a nuclear weapons state and the hard fact that its capabilities and geopolitical environment have radically changed should be a prerequisite for predicting and thinking everything in the future.

No one can deny the reality and should not misunderstand.

Any attempt to deny the position of the DPRK as a nuclear weapons state which was established along with the existence of a powerful nuclear deterrent and fixed by the supreme law reflecting the unanimous will of all the DPRK people will be thoroughly rejected.

The DPRK is open to any option in defending its present national position.

There should be a minimum judgment to admit that it is by no means beneficial to each other for the two countries possessed of nuclear weapons to go in a confrontational direction, and if so, it would be advisable to seek another way of contact on the basis of such new thinking.

I do not want to deny the fact that the personal relationship between the head of our state and the present U.S. president is not bad.

However, if the personal relations between the top leaders of the DPRK and the U.S. are to serve the purpose of denuclearization, it can be interpreted as nothing but a mockery of the other party.

If the U.S. fails to accept the changed reality and persists in the failed past, the DPRK-U.S. meeting will remain as a "hope" of the U.S. side.

HOPE OF SEOUL IS NOTHING BUT A FOOLISH DREAM

Press Statement Published by the Korean Central News Agency

August 14, 2025

The ROK is dreaming of spring at an unseasonable time.

Media of the ROK made a conjecture on August 12 that the DPRK's inmost thoughts may be conveyed to the U.S. side at the Russia-U.S. summit meeting to be held soon. This is a typical proof that the ROK is having a false dream.

If a dream is repeated very often, it will be an empty one, and oft-repeated conjectures will lead to self-contradiction that will never be solved.

Why should we send a message to the U.S. side?

I would like to remind again the world, which is listening to false conjectures spread by the ROK media, that we have nothing to do with the U.S.

I have already said clearly that the special personal relations between the top leaders of the DPRK and the U.S. will not be reflected in the policy and that if the U.S. persists with the outdated way of thinking, the meeting between the top leaders will remain only the "hope" of the U.S. side.

We are not at all interested in talks that are obsessed with the irreversible past, and there is no more need to explain the reason.

I take this opportunity to comment on the fact that the ROK is misleading the public opinion by saying that we have removed the loudspeakers installed on the southern border area.

Recently, the ROK has tried to mislead public opinion by saying that its "goodwill measures" and "appeasement policy" are meeting a response, as well as to create public opinion as if the DPRK-ROK relations are being "restored".

The ROK president said that after they first had removed the loudspeakers facing towards the DPRK, we, too, seemed to be removing some loudspeakers, hoping that such measures taken by each other as removing "unnecessary and costly loudspeakers" would help improve the "inter-Korean relations".

Days ago, the Joint Chiefs of Staff of the ROK, too, announced that the movement of removing loudspeaker by the DPRK has been detected.

The irony is that after hearing the announcement by the military, the authorities and experts of the ROK are making such comments as a "response measure" and "change detected" and a "positive response".

Stating the fact first, it is unfounded unilateral supposition and a red herring.

We have never removed loudspeakers installed on the border area and are not willing to remove them.

I think that the present government of the ROK looks forward to being appraised for doing a good job by nullifying the measures taken unilaterally by the Yoon Suk Yeol regime, trying to incite someone's response.

As to the joint military drills, it is pretending hard to make proactive efforts for detente, talking about adjustment and postponement. But it does not deserve praise and will prove futile.

The rulers of Seoul have some purpose in building up the public opinion while embellishing their new policy towards the DPRK.

It is their foolish calculation that if they manage to make us respond to their actions, it would be good, and if not, their actions will at least reflect their "efforts for detente" and they will be able to shift the responsibility for the escalation of tensions onto the DPRK and win the support of the world.

However, such a trick is nothing but a "pipedream" and it does not draw our attention at all.

Whether or not the ROK withdraws its loudspeakers, stops broadcasting, postpones its military exercises and downscales them, we do not care about them and are not interested in them.

The shabby deceptive farce is no longer attractive.

I am confident that Seoul's policy towards the DPRK remains unchanged and can never change.

Although a filthy thing is wrapped with a wedding veil, it will still emit a stench. And no matter how hard they pretend to be righteous and they beautify and justify their actions, they can never cover up the hostile intention.

The U.S.-ROK joint military drills to be started on August 18 will undoubtedly make the hostile nature of the ROK brought to light again.

We have clarified on several occasions that we have no will to improve relations with the ROK, the U.S. faithful servant and ally, and this conclusive stand and viewpoint will be fixed in our constitution in the future.

It will be a very just measure.

The ROK stipulated its wild ambition for unification by absorption in its constitution, organized the "U.S.-ROK nuclear consultative group" focusing on preemptive nuclear strike at the DPRK, and regularly holds a confab. And it is engrossed in different war

drills of aggressive nature, while repeating such a silly talk as "denuclearization" and totally denying our constitution.

This is the stark reality of the DPRK-ROK relations witnessed by the world today.

Our stand towards a dangerous and base state which is imposing a constant security threat on the DPRK should be clearer, and the ROK should be permanently described as the forces most hostile to the DPRK in its true colors, which should be stipulated in our national law.

It is little short of wishing for a flower in bloom in the desert to expect or divine the change in our cognition towards the most hostile state in the world.

CENSURE HELD AT A CONSULTATIVE MEETING WITH MAJOR DIRECTOR GENERALS OF THE FOREIGN MINISTRY OF THE DPRK

Carried by the Korean Central News Agency

August 20, 2025

Kim Yo Jong, vice department director of the Central Committee of the Workers' Party of Korea, at a consultative meeting with major director generals of the Foreign Ministry of the DPRK on August 19 sharply criticized the essence of the deceptive "appeasement offensive" of the ROK government and its double character and conveyed the foreign policy plan of the head of state.

Kim Yo Jong analyzed the behaviour of Seoul which is feigning that the ROK's policy towards the DPRK is making a "rapid U-turn" while saying that it respects the social system of the DPRK and will not seek any form of unification by absorption and has no intention of committing all hostile acts.

She said that now the president of the ROK, whenever an opportunity presents itself, is talking about "pebble", "trust" and "patience" like a vagarious poet, saying that "mutual trust would be restored if little practices are piled up like pebbles" and Jong Tong Yong, a minister serving the ROK authorities, put forth a so-called five-point core tasks in a report on major work plan at a foreign affairs and unification committee of the National Assembly.

Saying that it is like an endemic in Seoul where every regime and everyone have a dream and interpret it of their own accord and express "hope" and "idea" as they please, she disclosed the strange nature of the ones in the ROK and their sinister intention.

She said:

Commenting on the idea, every word and phrase of it is a fancy and a pipedream.

It's like listening to a resolution speech.

As the old saying goes that it takes two to wrestle, how can he put such a resolution into practice by himself alone?

The ROK people seem satisfied only to hear a government official's resolution full of such unrealizable dreams.

Certainly, we can see at once the "serious efforts" to create a good impression that something is changing for the "improvement" of the DPRK-ROK relations after Lee Jae Myung took power.

The real intention is to show continuously that they are making steady efforts for peace.

But no matter how desperately the stinky confrontational nature is swathed in a wrapper of peace, the awl in the sack can never be hidden.

We have witnessed and experienced the dirty political system of the ROK for decades as well as the process of regime change from Moon Jae In to Yoon Suk Yeol and now we are sick and tired of it.

To state the conclusion, the ambition for confrontation with the DPRK has been invariably pursued by the ROK, whether it held the signboard of "conservatism" or wore a mask of "democracy".

Lee Jae Myung is not the sort of man who will change the course of history.

We clearly remember that Jo Hyon and An Kyu Baek, the chiefs of diplomacy and defense, which form the basis of the Lee Jae Myung regime, openly said at a time when they were designated as candidates that they regard the north Korean regime and the north Korean army as their enemies.

At this moment, the Lee Jae Myung regime is repeating the predecessors' gibberish of "defensive drill" even after staging the reckless U.S.-ROK war drill for aggression directly threatening the security of the DPRK.

This is the part clearly illuminating the double character of the Seoul authorities who are carrying two faces under the hood.

As I emphasized a few days ago, there is a clear purpose for the rulers of the ROK in producing amicable image.

They also know that the DPRK-ROK relations desired by them will never come back.

If they don't know, they will be idiots.

They continue to tediously talk about peace and improved relations, being well aware that it is impossible to realize them, because they have an ulterior motive to finally shift the responsibility for the DPRK-ROK relations failing to recover on to the DPRK.

We should not forget the fact that any one in the ROK is the top-class faithful dog of the U.S.

In particular, we should pay attention to the fact that through the current joint military drill, which is being staged again while making a sign of reconciliation, the ROK is examining a new combined operation plan ("OPLAN 5022") for "removing" the nuclear and missile capabilities of the DPRK at an early stage and expanding the attack into its territory.

Clarifying once again on this occasion, the ROK cannot be a diplomatic partner of the DPRK.

The ROK, which is not serious, weighty and honest, will not have even a subordinate work in the regional diplomatic arena centered on the DPRK.

The DPRK Foreign Ministry should seek a proper countermeasure as regards the relations with the most hostile state and the states listening to its instigation, based on the conclusion of our head of state who pointed out the essence of the ROK..

At the consultative meeting, Kim Yo Jong conveyed the respected Comrade Kim Jong Un's foreign policy plan for taking a preemptive counteraction in a diplomatic way against the enemy states posing a lasting danger to the sovereignty and security of the DPRK and for controlling the rapidly-changing regional and international geopolitical situation in conformity with the national interests of the DPRK and held an in-depth discussion on the orientation of the immediate diplomatic activities.

**I REMIND THEM THAT THE SHOW OF STRENGTH IN THE
WRONG PLACE WILL INEVITABLY BRING BAD RESULTS TO
THEMSELVES**

Press Statement Published by the Korean Central News Agency

September 14, 2025

A few days later, nuclear operation drill dubbed Iron Mace and multi-domain joint military exercises Freedom Edge will be staged simultaneously on the Korean peninsula and in the surrounding region with the participation of the U.S. and its allies.

We have already cautioned that the "Guidelines for Nuclear Deterrence and Nuclear Operations on the Korean Peninsula" fabricated by the U.S. and the ROK are, indeed, a dangerous "idea".

If the present rulers have sympathized with the dangerous "idea" cooked up by the former rulers and put it into practice with full consideration given to it, we will regard it as an unfiltered "demonstration" of their anti-DPRK confrontational stand and "succession" of confrontational policy.

I remind the U.S., Japan and the ROK that the reckless show of strength made by them in real action in the vicinity of the DPRK, which is the wrong place, will inevitably bring bad results to themselves..
